

Irlam Square

Issue:

This block of flats is situated in the middle of a busy shopping area of Salford, with banks, betting shops etc nearby.

Due to the nature of the area there is a lot of anti-social behaviour both in and around the flats.

Solution:

CCTV cameras were fitted within the building, in the communal areas, and on the external walls overlooking the external doors and entrances, to provide overall coverage of the potential 'trouble spots'

This CCTV system has remote access to allow live viewing of images from any PC / Smartphone (With the correct login credentials), and records 24 hours a day across all cameras

Conclusion:

The work that Astbury carried out has allowed the identification of anti-social behaviour and those that are responsible for it.

A number of incidents have been captured on the system since its installation including 3 bank robberies and an attempted murder, which have helped the police force with their enquiries.
